An international conference aimed at exploring current research and trends in wood firing will be held at Bröllin in September 2010. Bröllin Wood Fire will run over three days, and is expected to attract around two hundred delegates from Europe as well as overseas.

Keynote speakers will address a series of questions, follow-up forums will give an international overview and discuss technical and aesthetical issues. Exhibitions will be held to coincide with the conference - aimed at presenting a wide survey of wood fire practice. Forums will be held each day, as well as demonstrations, exhibition openings, kiln firings and social events. There will also be Pre-Conference Workshops in the week leading up to the Conference.
